DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-42 and 53-65, drawn to a device for user interaction, classified in class 345, subclass 173.
 - II. Claims 43-52, drawn to a passive stylus device, classified in class 345, subclass 179.

The inventions are distinct, each from the other because of the following reasons:

Inventions an input device in conjunction with a display and a passive stylus are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims 16 and 18 discuss an object able to produce a field, which would be an active device, while claim 22 discusses using a passive object, thus both passive and active objects could be used with the input system. The subcombination has separate utility such as the passive stylus could be used as a resonating probe for use in determining the presence of specific frequencies of radiation in an environment or detection of a signal being transmitted on a specific wavelength.

Art Unit: 2673

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
